Minerals Processing & Construction Equipment

Our equipment is designed for use in mining applications such as ore recovery and minerals processing. S. Howes and Howes Filtration equipment is used in applications including: hydromet processing; merrel crowe (gold recovery);

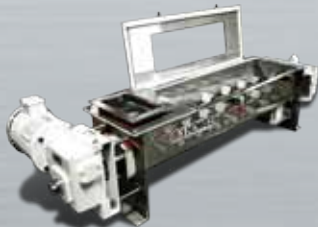

pre-filtration for electrowinning; repulp processing; molten sulphur recovery; nickel and copper catalyst recovery; uranium recovery, etc. Our sales engineers can guide you through the equipment selection process.

Mixing & Blending

Our proven designs provide a superior, uniform mix complemented by a robust construction. Both batch and continuous mixing designs are available.

Continuous Mixer

Continuous Lab Mixer

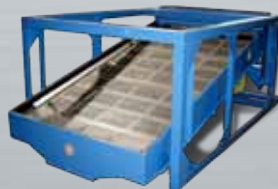

Batch Mixer

Separating and Screening

We offer a variety of rotary and vibratory screening. Applications include scalping or separations up to three decks.

Power Sifter

Screener

Vibrating Table

Size Reduction

Our heavy duty machines can reduce the size of feedstocks for downstream processing.

Rotary Knife Cutter

Lumpbreaker

Screw Conveyors

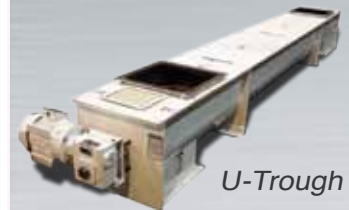

S. Howes conveyors are built to handle most non-liquid materials and are significantly more robust than typical CEMA conveyors.

Stainless & exotic alloys

Unloading Hopper

U-Trough

We design and manufacture pressure leaf filters and tubular filters.

Filtration

Horizontal Leaf Filters

Vertical Leaf Filters

Lab Filters

Tubular Backwash
